

RIZWAN ULLAH

Software Engineer | MERN Stack Developer | Full-Stack Developer
Peshawar, Pakistan | rizwanullahicp0306@gmail.com | +92-306-9675420
GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Software Engineering graduate with hands-on experience shipping production-grade full-stack web applications on the MERN and PERN stacks. Proficient in JavaScript (ES6+), TypeScript, React.js, Node.js, Express.js, MongoDB, and PostgreSQL — specialising in RESTful API design, JWT authentication, RBAC, and responsive UI. Delivered four portfolio applications across AI tooling, e-commerce, project management, and marketplace domains. Targeting junior/graduate engineering roles in the UAE, Saudi Arabia, and remote international markets.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
Frontend: React.js, Tailwind CSS, Responsive Design, Component Architecture
Backend: Node.js, Express.js, RESTful API Design, Middleware, MVC Architecture
Databases: MongoDB (Mongoose ODM), PostgreSQL, Schema Design, Query Optimisation
Auth & Security: JWT, bcrypt, Role-Based Access Control (RBAC), Input Validation
Tools: Git, GitHub, Postman, VS Code, Vercel — MERN Stack | PERN Stack | Agile
Exploring: Next.js, Docker, Jest, AWS Cloud Fundamentals

PROJECTS

AI-Powered Resume Builder

MERN Stack | React.js · Node.js · Express.js · MongoDB · JWT · Tailwind CSS · PDF Generation

- Architected a full-stack AI resume builder with real-time client-side preview; integrated an AI content suggestion API cutting estimated editing time by 40%.
- Built a JWT + bcrypt auth system protecting all endpoints, a flexible Mongoose document schema, and a client-side PDF export pipeline preserving exact layout and typography.
- Delivered 3 switchable Tailwind CSS templates with full mobile/desktop responsiveness.

Car Rental Management Platform

MERN Stack | React.js · Node.js · Express.js · MongoDB · JWT · RBAC · Tailwind CSS

- Engineered 20+ RESTful API endpoints across Cars, Bookings, Users, and Admin controllers with centralised error-handling middleware and consistent JSON response contracts.
- Implemented 2-tier RBAC (User/Admin) with JWT route guards and real-time date-conflict validation to prevent double-booking across concurrent reservations.

Project Management System

PERN Stack | React.js · Node.js · Express.js · PostgreSQL · JWT · RBAC · Raw SQL · Tailwind CSS

- Designed a normalised PostgreSQL schema (7+ tables) with FK constraints and indexes; built 3-tier RBAC (Admin/Member/Viewer) enforced at middleware and UI levels.
- Developed analytics endpoints aggregating task completion rates and member metrics, surfaced as a real-time progress dashboard.

E-Commerce Web Application

MERN Stack | React.js · Node.js · Express.js · MongoDB · JWT · REST API · Tailwind CSS

- Built a full-featured e-commerce platform with product catalogue, persistent cart (server-side stock validation), and a full order lifecycle pipeline (Pending → Shipped → Delivered).
- Engineered an admin CRUD dashboard for products, orders, and users behind JWT-authenticated protected routes.

EDUCATION

Bachelor of Science in Software Engineering | 2022 – 2026

Islamia College University Peshawar — Peshawar, Pakistan

Coursework: Data Structures & Algorithms · DBMS · OOP · Web Technologies · Software Engineering · Networks · OS · Project Management

ADDITIONAL INFORMATION

Languages: English (Professional) · Urdu (Native) · Pashto (Native) **Interests:** Open-Source · Backend Architecture · AI-Integrated Apps · System Design
