PROFESSIONAL SUMMARY

Software Engineering graduate specialising in full-stack development across the MERN, PERN, and Next.js ecosystems. Proficient in JavaScript (ES6+), TypeScript, React.js, Next.js, Node.js, Express.js, MongoDB, and PostgreSQL — with hands-on experience in RESTful API design, JWT authentication, RBAC, third-party AI integrations, and containerised deployment. Delivered a multi-portal SaaS healthcare platform with AI-powered OCR and telemedicine, alongside production-grade project management and analytics applications. Targeting junior/graduate Software Engineer and Full-Stack Developer roles.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frontend: React.js, Next.js (App Router), Tailwind CSS, Responsive Design, Component Architecture

Backend: Node.js, Express.js, RESTful API Design, Middleware, MVC Architecture, Microservices

Databases: MongoDB (Mongoose ODM), PostgreSQL, Prisma ORM, Schema Design, Query Optimisation

Auth & Security: JWT, bcrypt, Clerk, Role-Based Access Control (RBAC), Input Validation

DevOps & Tools: Docker, Git, GitHub Actions (CI/CD), Postman, VS Code, Vercel, Redis

Integrations: AI APIs (Gemini, Groq), Twilio, WebRTC (Jitsi), REST & Webhooks

Exploring: Jest, AWS Cloud Fundamentals, Kubernetes Basics

PROJECTS

Smart Healthcare Ecosystem — SaaS Appointment & Diagnostic Platform — [Live Demo](#)

MERN + Microservices | React.js · Node.js · Express.js · MongoDB · Redis · Docker · Python · Gemini AI · WebRTC · Twilio

- Architected a multi-tenant SaaS healthcare platform connecting patients, doctors, labs, and pharmacies across 3 role-based portals behind an Nginx reverse-proxy gateway.
- Integrated AI-powered prescription OCR (Gemini + Groq with automatic fallback) and WebRTC telemedicine (Jitsi SDK) for live video consultations between patients and doctors.
- Built a voice-activated appointment booking channel (Vapi.ai) and automated SMS/email reminders (Twilio) via a secured cron endpoint to reduce no-show rates.
- Engineered Redis caching and BullMQ job queues for async processing; containerised the full stack with Docker Compose and automated CI/CD via GitHub Actions.

Project Management System — [Live Demo](#)

PERN Stack | React.js · Node.js · Express.js · PostgreSQL · JWT · RBAC · Raw SQL · Tailwind CSS

- Designed a normalised PostgreSQL schema (7+ tables) with FK constraints and indexes; built 3-tier RBAC (Admin/Member/Viewer) enforced at middleware and UI levels.
- Developed analytics endpoints aggregating task completion rates and member metrics, surfaced as a real-time progress dashboard.

SleepTracker — Sleep Analytics Web Application — [Live Demo](#)

Next.js 16 (App Router) | React 19 · TypeScript · Prisma ORM · PostgreSQL (Neon) · Clerk Auth · Chart.js

- Built a full-stack sleep tracking app on Next.js App Router using Server Actions and revalidatePath for real-time dashboard updates without client-side fetch overhead.
- Integrated Clerk authentication with automated user-sync middleware and an analytics dashboard computing monthly averages and trends via interactive Chart.js visualisations.

E-Commerce Web Application

MERN Stack | React.js · Node.js · Express.js · MongoDB · JWT · REST API · Tailwind CSS

- Built a full-featured e-commerce platform with product catalogue, persistent cart (server-side stock validation), and a full order lifecycle pipeline (Pending → Shipped → Delivered).
- Engineered an admin CRUD dashboard for products, orders, and users behind JWT-authenticated protected routes.

EDUCATION

Bachelor of Science in Software Engineering | 2022 – 2026

Islamia College University Peshawar — Peshawar, Pakistan

Coursework: Data Structures & Algorithms · DBMS · OOP · Web Technologies · Software Engineering · Networks · OS · Project Management

ADDITIONAL INFORMATION

Languages: English (Professional) · Urdu (Native) · Pashto (Native) **Interests:** Open-Source · Backend Architecture · AI-Integrated Apps · System Design
